

Many cats love having their forehead gently stroked.

Cats only sweat through their paws and nowhere else on their body

A cat's whiskers are thought to be a kind of radar, which helps a cat gauge the space it intends to walk through.

A cat's normal pulse is 140-240 beats per minute, with an average of 195.

On average, cats spend $\frac{2}{3}$ of every day sleeping. That means a nine-year-old cat has been awake for only three years of its life.

Cats do not think that they are little people. They think that we are big cats. This influences their behavior in many ways.
